DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a DLL circuit having an initialization and a locked mode.

Group II, claim(s) 5-6, drawn to a variable delay addition circuit wherein a fine delay includes a register.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they correspond to a combination and subcombination relationship. The combination, Group I, does not require the details of the subcombination, Group II, as claimed and vice versa. Group I does not require a register within the fine delay circuit or a switch for bypassing the fine delay circuit. Group II does not require an initialization mode, a locked mode, a clock driver, or a first signal generator. Furthermore, the subcombination has utility by itself as a circuit which provides variable delay.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2816

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
